

ROOM 202

Mrs. Severe and Ms. Delange

Birthdays

When a student has a birthday we have a special birthday walk in the classroom. During the birthday walk, students are able to share things they have done each year of their life. Students may bring pictures or a treat to share with the class, but it is not required. If your student had a birthday during the summer, please send a note or email and we can schedule a special time to have a birthday walk.

There is always important paper work that needs to be collected at the beginning of each school year. Please see if there are any forms attached to this newsletter that need to be completed and return them as soon as possible to school with your student.

Students are allowed to have a small snack during the morning work time. If your child would like to have a snack, please send something extra to school. These snacks need to be healthy and support the learning environment.

We are now in our third week of school and students are working hard in class. We have studied living and non-living things, discussed why plants are important, practiced making our classroom peaceful and much more. Students will soon be studying vertebrate and invertebrate animals. We will also be learning about the parts of a plant. In about two weeks, we will have our annual "Parts of a Plant Salad". This is exciting for students as they are able to bring in roots, vegetables, fruits, leaves, stems and seeds to share in the salad. Students are also able to help prepare the salad for the class to eat. If you would like to volunteer to help during this activity, please let me know. It is tentatively scheduled for Friday, September 4th.

You may contact me by email or phone at any time that you have a question, comment or concern. My information is listed at the bottom of this page. There is also a Wiki address listed. This is our class page where I will post frequently used links and pictures of what we are doing in class. Please take a moment to look at the "Class Happenings" on the Wiki.
